

## **Module-4**

**Q : 1 What are the main factors that can affect PPC bidding?**

**Answer :**

### **→ Main Factors That Affect PPC Bidding**

#### **1. Keyword Competitiveness**

- Highly competitive keywords (especially in lucrative industries) naturally have higher CPCs.
- Seasonal spikes (festivals, holidays) can also drive up bids temporarily.

#### **2. Quality Score**

- Google Ads and other platforms reward high-quality ads (relevance, CTR, landing page experience) with lower CPCs.
- A better Quality Score can outperform higher bids from competitors.

#### **3. Ad Relevance & CTR**

- The closer your ad matches the user's intent, the better your CTR.
- Higher CTR signals to the platform that your ad deserves a better position at a lower cost.

#### **4. Landing Page Experience**

- Fast-loading, mobile-optimized, and conversion-focused pages reduce bounce rate.
- Platforms factor this into your ad rank and CPC.

#### **5. Target Audience & Demographics**

- Location, device, age, income level, and time-of-day targeting can all influence bid prices.
- Niche audiences may cost more but deliver better ROI.

#### **6. Ad Rank Thresholds**

- Each auction has minimum thresholds you must meet for your ad to appear.
- If competition raises their bids, your minimum threshold can increase too.

#### **7. Bidding Strategy**

- Manual CPC, enhanced CPC, target CPA, or target ROAS strategies allocate budget differently.

- Automated strategies can sometimes overspend if not monitored properly.

## 8. Industry & Seasonality

- Certain industries (finance, insurance, real estate) have inherently high CPCs.
- Seasonality (Black Friday, Diwali, tax season) drives up competition and costs.

## 9. Competitor Activity

- Aggressive bidding or entry of new competitors in your space can suddenly raise CPC.
- Monitoring competitors can help adjust bids proactively.

## 10. Budget Constraints & Ad Scheduling

- If your daily budget is limited, the platform may throttle your impressions.
- Adjusting ad scheduling to peak hours can help control spend and increase conversion rates.

## Q : 2 How does a search engine calculate actual CPC?

### Answer :

#### → How a Search Engine Calculates Actual CPC

Search engines like Google Ads don't charge you your maximum bid — instead, they use an auction model to decide how much you actually pay per click.

The core formula:

$$\text{Actual CPC} = \frac{\text{Ad Rank of Competitor Below You} + (\text{small increment})}{\text{Your Quality Score}}$$

---

#### ~> Step-by-Step Breakdown

##### 1. Ad Rank Determines Position

- Each advertiser's Ad Rank = (Max Bid × Quality Score).
- Higher Ad Rank = better ad position.

##### 2. Competitor Below You Sets Your Price

- You only need to outbid the competitor directly below you, not everyone in the auction.
- This keeps CPCs efficient and fair.

##### 3. Quality Score Discounts CPC

- If your ad's Quality Score is higher than competitors', you'll pay less for the same position.

#### 4. Small Increment

- Search engines add a minimal amount (like \$0.01) to ensure you beat the competitor below you.

#### ~ Example

- Your Max Bid: \$5
- Your Quality Score: 8
- Competitor Below's Ad Rank: 30

$$\text{Actual CPC} = \frac{30}{8} + 0.01 = \$3.76$$

You pay \$3.76 per click (not \$5) because your higher Quality Score earned you a discount.

## Q : 3 What is a quality score and why it is important for Ads?

### Answer :

#### What Is Quality Score?

Quality Score is a metric used by platforms like Google Ads to measure the **overall relevance and quality** of your keywords, ads, and landing pages. It's rated on a scale of **1–10** and reflects how well your ad experience matches a user's intent.

It's calculated from three main components:

1. **Expected Click-Through Rate (CTR)** – Likelihood users will click your ad.
  2. **Ad Relevance** – How closely your ad copy matches the user's search intent.
  3. **Landing Page Experience** – Relevance, usability, and performance of your landing page.
- 

#### ♦ Why Is Quality Score Important?

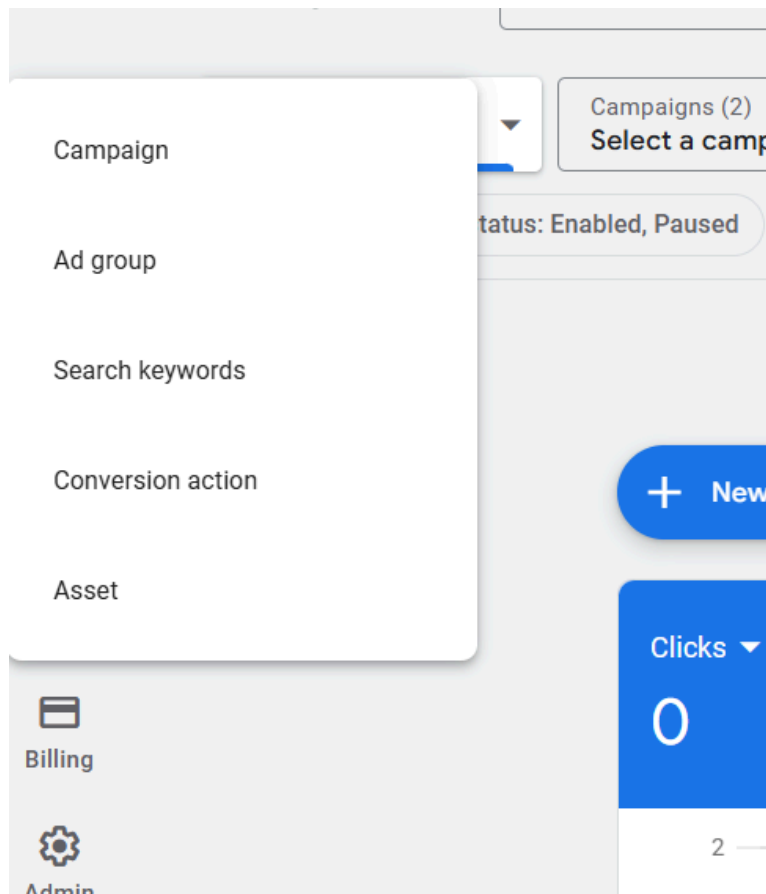

1. **Lower CPC (Cost Per Click)**
  - Higher Quality Score = lower actual CPC.
  - You can win better ad positions while paying less than competitors.
2. **Better Ad Position**
  - Ad Rank = Max Bid × Quality Score.

- A strong Quality Score boosts Ad Rank even with modest bids.
- 3. **Higher ROI**
  - You get more qualified clicks for the same budget.
  - Leads to more conversions and better campaign profitability.
- 4. **Improved User Experience**
  - Relevant ads and better landing pages improve customer trust and engagement.
- 5. **Competitive Edge**
  - Even small advertisers can outperform big-budget competitors by focusing on ad quality.

**Q : 4 Create an ad for your website/ blog in Google Ads that display on the display network with the properly targeted audience**

**Answer :**
