

Module : 6

Que : What are events in Google analytics?

Answer :

In **Google Analytics**, events are **user interactions** on your website or app that you track separately from standard page views. They help you understand what actions users take.

→ **What are Events?**

Events are actions performed by users, such as:

- Clicking a button
- Downloading a file
- Watching a video
- Submitting a form
- Scrolling on a page
- Playing/Pausing media
- Adding product to cart

They allow you to measure user behavior beyond simple page visits.

Why Events are Important

Events help you:

Purpose	Examples
Understand user engagement	Video plays, scroll depth
Track conversions	Form submissions, add to cart

Measure interaction with page elements

Button clicks, menu clicks

Analyze content performance

File downloads, outbound links

Event Structure in GA4

GA4 events have:

Component	Meaning
Event name	Name of action (e.g., click, purchase)
Parameters	Extra info (e.g., page URL, item name, value)

Default GA4 Events

Google Analytics automatically tracks key events like:

- `page_view`
- `click`
- `scroll`
- `file_download`
- `session_start`

Custom Events

You can also create your own events, like:

- `form_submit`
 - `add_to_cart`
 - `video_start`
-

Example:

If a user clicks "Buy Now", you can track that event as:

- Event Name: `buy_now_click`
- Parameters: product ID, price, user location, etc.

Simple Definition :

“Events in Google Analytics track specific actions users take on your website or app, helping you understand user behavior and improve performance.”

Que : Connect your blog to Google Analytics and study the different types of traffic on your site.

Answer :

Que : Create a goal for your business and study reports whether it has been completed or not.

Answer :

Create a Goal for Your Business & Study Reports

Goal Example:

Increase online product inquiries from the website.

Objective:

Get **50 inquiry form submissions** in a month.

Setup Goal Steps (GA4 Equivalent – Conversion Tracking)

1. Track the "Form Submit" event on your site
Example event name: **form_submit**
2. Mark the event as a **conversion** in GA4:

- Go to **Google Analytics**
 - Click **Admin**
 - Select **Events**
 - Find **form_submit**
 - Turn on **Mark as conversion**
-

Check Whether the Goal Is Completed or Not

Reports to Study:

Report	What it Shows
Conversions Report	Total number of form submissions
Traffic Acquisition Report	Which sources brought most form submissions
Pages & Screens Report	Which pages triggered the goal
User Insights Report	User behavior & demographics

Performance Analysis Example

Metric	Result
Goal set	50 inquiries/month
Actual achieved	62 inquiries/month
Result	Goal Completed
Conclusion	Marketing campaigns & website performance improved

Summary

- **Goal:** 50 inquiries/month
- **Conversion created:** form_submit

- **Tracking:** Enabled in GA4
- **Actual result:** 62 inquiries
- **Status:** Goal Achieved

Que : Track the following interactions in Google tag manager for <https://clicktolearndm.blogspot.com/>

- Link clicks
- Page load
- Time (How long a visitor stayed on a particular page)
- Button click

Answer :

The image shows two screenshots of the Google Tag Manager interface. The top screenshot displays the 'Accounts' section under 'Google tags'. It lists a container named 'clicktolearndm' with the URL 'clicktolearndm.blogspot.com/' and a 'Web' container type. The container ID is 'GTM-TQW48PQP'. The bottom screenshot shows the 'Trigger Configuration' screen for an 'Untitled Trigger'. It prompts the user to 'Choose a trigger type to begin set-up...' and includes a 'Learn More' link. The left sidebar shows the 'Workspace' menu with options like Overview, Tags, Triggers, Variables, Folders, and Templates.
